1 [Key management for encrypted broadcast](#)

Avishai Wool

 May 2000 ACM Transactions on Information and System Security
(TISSEC), Volume 3 Issue 2

Publisher: ACM

 Full text available: pdf(220.36 KB) [Additional Information: full citation, abstract, references, index terms](#)

We consider broadcast applications where the transmissions need to be encrypted, such as direct broadcast digital TV networks or Internet multicast. In these applications the number of encrypted TV programs may be very large, but the secure memory capacity ...

2 [A secure infrastructure for service discovery and access in pervasive computing](#)

Jeffrey Undercoffer, Filip Perich, Andrej Cedilnik, Lalana Kagal, Anupam Joshi

April 2003 Mobile Networks and Applications, Volume 8 Issue 2

Publisher: Kluwer Academic Publishers

 Full text available: pdf(308.34 KB) [Additional Information: full citation, abstract, references, cited by, index terms](#)

Security is paramount to the success of pervasive computing environments. The system presented in this paper provides a communications and security infrastructure that goes far in advancing the goal of anywhere-anytime computing. Our work securely enables ...

Keywords: distributed services, extensible markup language, pervasive computing, security, smartcards

3 [A security architecture for pay-per-view business models in conditional access systems](#)

Bart Kirkels, Martijn Maas, Peter Roelse

October 2007 DRM '07: Proceedings of the 2007 ACM workshop on Digital Rights Management

Publisher: ACM

Full text available:  pdf(488.25 KB) [Additional Information: full citation, abstract, references, index terms](#)

This paper presents a security architecture for a pay-TV conditional access system, assuming the most challenging scenario from a designer's point of view; a pay-per-view business model in a broadcast-only environment. The starting point for the security ...

Keywords: conditional access system, cryptography, pay-TV, queueing theory, security architecture
